Johnson County Community Health Services is improving the quality of life for the communities we serve by providing quality Home Health, Public Health, and WIC services.
Johnson County Community Health Services has provided public health and home health for our communities since 1975. We have a rich history and are looking forward to continuing our mission of improving the quality of life in the communities we serve.

This past fiscal year we have see some great successes, but also made some difficult decisions. We have seen our Home Healthcare division increase its case load and are now the highest recommended provider in the area! Our Public Health division weathered a busy flu season, while our Environmental Public Health area launched and awarded the first recipients of our Food Safety Excellence awards. The Women, Infants, and Children (WIC) program was recognized as being among the best in the state for breastfeeding adoption and retention.

Other areas of success include the launch of JoCo Helps, an online portal for resources in and around Johnson County. We strengthened partnerships to provide new services, while our social media platforms educated the public.

In order to better meet and provide the best possible care for our communities, JCCHS has ended hospice services as of August 1st. This change will allow us to be better positioned to provide top tier quality home healthcare services along with public health and WIC programs.

2017\2018 was a great year, and I am looking forward to the new year.

Anthony Arton, Administrator
HOME HEALTHCARE

The Home Health team made 3,454 visits last year which was a 41% increase over the previous year, while seeing our customer satisfaction scores increase as well!

The most important member of our Home Healthcare team is YOU. We work with you and your physician to improve your quality of life!
Did you know that 50% of people with Hepatitis C don’t know they have it? JCCHS can screen for HEP C as part of a Hepatitis panel screening.
WIC families save $70 on average on their monthly grocery expenses! Our staff works to make sure families eat healthy and stay healthy.

Missouri WIC
Eat Healthy. Stay Well.
Food inspection reports for every Johnson County food serving establishment can be found at JohnsonCountyHealth.org/food inspections
**VITAL RECORDS**

3,534 birth or death certificates were printed by JCCHS staff in 2017-2018!

Some reasons you may need a birth certificate include enrolling for school, getting a passport, marriage license, and even genealogy research.
